

How to Access Interpretation in a Microsoft Teams Meeting

When you join a meeting needing language interpretation, you can choose which language you want to hear.

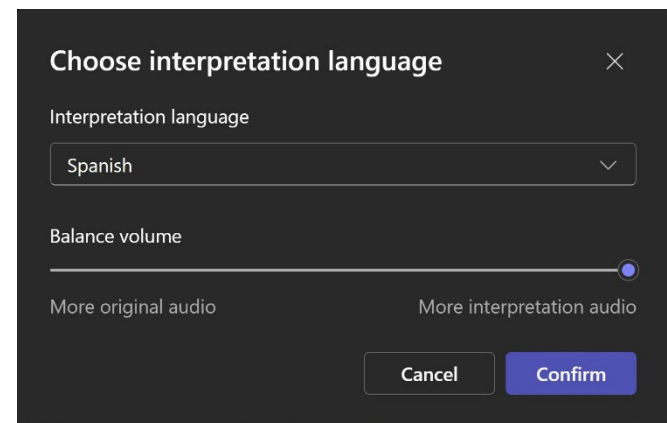

1. Select '[Choose interpretation language](#)' when you join the meeting.

2. Select your language from the '[Listen to the meeting in](#)' dropdown menu.

3. You can adjust the '[Balance volume](#)' slider to hear a mix of interpreter and original audio. Adjust to what will work best for you.

4. Select '[Save](#)' to apply changes immediately.

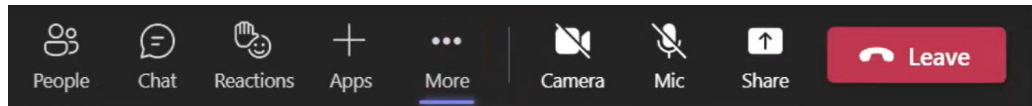

Note: If you turn on [spatial audio](#) in a meeting with live interpretation, you'll hear the original and translated audio at the same volume. Turn off spatial audio

BPN.16007.CYE25_EN

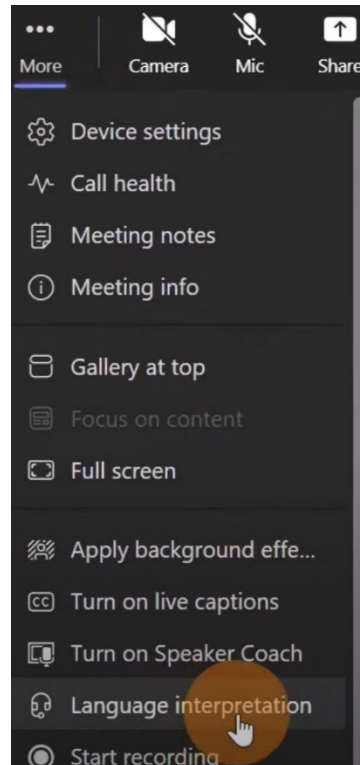

and rejoin the meeting to hear the interpreter's voice clearly with reduced original voice.

To change settings during the meeting

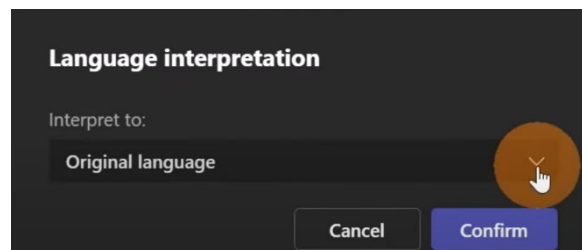

1. Select '[More actions](#)'.

2. Select '[Language and speech](#)'.

3. Select '[Language interpretation](#)'.

4. Make your desired changes.

5. Select '[Save](#)'.
